

SYSTEM REQUIREMENTS

Version 05 | 2017

All products of FAUSER AG are based on standards. This helps already to secure investments and ensures that the administrative costs are kept as low as possible. Here are the system requirements of the system environment.

Database Server

- Quad-Core
- 8 GB RAM
- Fast hard disk drive (ssd recommended)
- Data backup for database
- UPS (uninterruptible power supply)
- Windows Server 2008, or later (pay attention to compatibility with SQL Server version)
- SQL Server 2012 Standard Edition, or higher (recommendation: SQL Server 2014 Standard Edition)

Workstation JOBDISPO core MES

- Dual-Core (recommendation: Quad-Core)
(Desktop or workstation processors)
- 4 GB RAM
- Resolution for the software 1280x1024
- Windows 7, Windows 8.1, Windows 10

Workstation JOBDISPO core MDC

- Dual-Core (Desktop or workstation processors)
- 4 GB RAM
- Resolution for the software 1280x1024
- Windows 7, Windows 8.1, Windows 10
- USB hand-held scanner (recommendation: with push-button)

Workstation JOBDISPO V6 (ERP / MES / MDC)

- Dual-Core (Desktop or workstation processors)
- 4 GB RAM (2 GB for MDC)
- Resolution for the software 1280x1024
- Windows 7, Windows 8.1, Windows 10

Terminal server (user-dependent)

- Quad-Core or better
(Desktop or workstation processors)
- 8 GB RAM
- UPS (uninterruptible power supply)
- Windows Server 2008
(recommendation: Windows Server 2012 R2 or later)

Others

- 1-Gbit/s Network / Low latency <5ms
- Maintenance of the local IT environment by a system admin

Note:

Unless stated differently, all figures are minimum requirements. If requirements are not or only partially fulfilled system-related interferences can occur for which FAUSER AG will not assume any liability. Please contact your local hardware supplier or the team of FAUSER AG for any technical questions.
